REVIEW OF SUSPECT MISSILE SITES  
IN CUBA [REDACTED]

25X1D

This report is the third publication dealing with suspect missile sites in Cuba. 1/ 2/ The current report presents the results of a photographic study of 18 new areas in Cuba which, according to various information reports, contain suspect missile sites. A search of the best available [REDACTED] TALENT photography produced no positive evidence of missile facilities or activity at or near any of the locations.

25X1D

Following each location is a brief description of the activity observed and photo and document references, including the date of photography examined and the date of the information given in the document.

1. Ermita Sugar Mill (20-11N 75-24W)

No identifiable missile activity was observed within a radius of 5 nautical miles (nm) of the Ermita Sugar Mill. Minor entrenchments were observed in the hills just to the south of the mill.
